

SPECIALIZED CARE FOR CHILDREN

WHO WE ARE

Since 1937, we've been helping families of children with special health care needs in Illinois.

Today, thousands of families throughout Illinois receive some form of help from the University of Illinois at Chicago - Division of Specialized Care for Children each year. Services are coordinated by a network of professional staff, working out of regional offices across the state. We consistently draw on the relationships and knowledge we've built over the decades.

Care Coordination Teams

Staff work in care coordination teams throughout the state to help families in their community. Teams are formed based on each family's needs and may include:

- » Nurses
- » Social Workers
- » Audiologists
- » Speech-Language Pathologists

Physicians/Providers

It can be hard to find a provider who's an expert in specific health issues, who also has openings, is close to home, and works within a family's insurance coverage.

We've spent more than 75 years building relationships with the best doctors and providers for children with special needs. Not only do we fully understand the different conditions that require specialized care, we've worked first-hand with an impressive pool of specialists in and around Illinois.
